IW#16.08.01 – Laurel Hill Rd./Piscitello Dr./Queach Rd.- Installation of new water main, approved September 8, 2016

**For Consideration - plan revision for additional work - replacement of culvert at stream crossing**

EO Ross presented Sheet 13A, Culvert Replacement plan dated December 2016, to the commission, which depicts the proposed replacement of the culvert pipe located at the stream crossing on the unimproved section of Queach Road. This is required because the contractor found that the bottom of the pipe was rotted out so it needed to be replaced before the water main could be installed underneath it.

The commission reviewed the plan and accepted the revision with two stipulations.

1. The water diversion pathway is to be covered with erosion control fabric or something similar that would protect it from erosion from the water flow.
2. Upon completion all disturbed soils are to be seeded and stabilized.

Meeting was adjourned at 5:45 by motion of Commissioner Rose and 2<sup>nd</sup> by Commissioner Botta

Respectfully Submitted,

Diana Ross, IWEO
